Kids Colouring Page Builder Pro

Quick Start Guide

Thank you for purchasing Kids Colouring Page Builder Pro.

This guide will help you get started in just a few minutes.

Step 1 - Download The Software

After purchase, download the software ZIP file to your computer.

Once downloaded, right-click the ZIP file and select:

Extract All

or

Extract Here

depending on your operating system.

This will create a new folder containing all software files.

Step 2 - Open The Software

Open the extracted folder.

Inside the folder you will find:

Kids Colouring Page Builder Pro.html

Simply double-click the Kids Colouring Page Builder Pro.html file.

The software will automatically open inside your default web browser.

Supported browsers include:

- Google Chrome
- Microsoft Edge
- Firefox
- Brave
- Safari

No installation is required.

No monthly subscriptions are required.

No online login is required.

Step 3 - Complete Your Book Setup

Start by entering your basic book information:

- Book Title
- Subtitle
- Main Audience
- Main Theme
- Main Style

This information is used throughout the software to help generate consistent prompts and publishing assets.

Step 4 - Generate Cover Prompts

Click the **Cover Generator** tab.

Select your preferred options and click **Generate**.

The software will create a structured cover prompt designed for AI image generation.

Copy the prompt and use it inside your preferred AI image generator. ChatGPT.

Step 5 - Generate Interior Colouring Pages

Click the **Colouring Builder** tab.

Select:

- Audience
- Theme
- Style
- Detail Level
- Activity or Pose

Click **Generate** to create a new interior colouring page prompt.

Copy the prompt and paste it into your preferred AI image generator. ChatGPT.

Step 6 - Create Single Characters

Open the **Single Graphics Builder**.

Use this section to generate prompts for:

- Animals
- Dinosaurs
- Fantasy Creatures
- Occupations
- Vehicles
- Seasonal Characters

These prompts are ideal for isolated colouring page graphics.

Step 7 - Build Complete Themes

Use the **Theme Builder** to generate ideas for complete colouring books and book series.

This can help you expand a single niche into multiple books.

Step 8 - Generate Publishing Assets

The software also includes tools for:

- Book Introductions
- Amazon Book Listings Description
- Categories
- Backend Keywords
- Review Request Content
- Disclaimer page text prompt

These tools help support the publishing process after your book has been created.

Step 9 - Copy And Use Your Prompts

Each generator includes a copy button.

Simply click **Copy** and paste the generated prompt into your preferred AI image generation platform. ChatGPT.

Generate your images, review the results, and create your colouring book assets.

Important Notice

Kids Colouring Page Builder Pro generates prompts only.

AI-generated images are created using third-party AI image generation platforms and services.

Please review the terms and commercial usage rights of any AI platform you choose to use.
