How to Import Your Wedding Lead Magnet Landing Page Template

WordPress & Elementor Installation Guide

Your Wedding Lead Magnet Landing Page comes as an Elementor JSON template, allowing you to quickly add and customise the page on your own WordPress website.

Step 1 – Install Elementor

Make sure you have the free **Elementor** plugin installed and activated on your WordPress website.

Step 2 – Import Your Template

1. Log in to your WordPress dashboard.
2. Go to **Templates → Saved Templates**.
3. Click **Import Templates**.
4. Select the supplied `Wedding-Lead-Magnet-Landing-Page-Elementor-Template.json` file.
5. Click **Import Now**.

Step 3 – Create Your Landing Page

1. Go to **Pages → Add New**.
2. Give your page a title, such as *Free Wedding Planning Guide*.
3. Click **Edit with Elementor**.
4. Open the Elementor Template Library using the folder icon.
5. Select **My Templates** and insert your imported template.

Step 4 – Customise Your Page

- Replace the sample text with your own branding and offers.
- Upload the supplied wedding guide mockup image to your WordPress Media Library and replace the existing image.
- Connect the signup button to your own email marketing form or landing page.
- Check that the page displays correctly on desktop and mobile.

Step 5 – Publish Your Page

Once you're happy with your changes, click **Publish**.

Important: The signup button is a placeholder. You must connect your own email signup system and arrange delivery of your free guide before promoting the page.
