Workbook Sales Page Install Instruction

How to Import Your Wedding Budget Workbook Sales Page

WordPress & Elementor Installation Guide

Your Wedding Budget Blind Spots Workbook Sales Page comes as an Elementor JSON template, allowing you to quickly create and customise a professional sales page on your own WordPress website.

Step 1 – Install Elementor

Make sure the free **Elementor** plugin is installed and activated on your WordPress website.

Step 2 – Import Your Template

1. Log in to your WordPress dashboard.
2. Go to **Templates → Saved Templates**.
3. Click **Import Templates**.
4. Select the supplied Wedding Budget Workbook Elementor JSON file.
5. Click **Import Now**.

Step 3 – Create Your Sales Page

1. Go to **Pages → Add New**.
2. Give your page a title, such as *Wedding Budget Workbook*.
3. Click **Edit with Elementor**.
4. Open the Elementor Template Library using the folder icon.
5. Select **My Templates** and insert your imported template.

Step 4 – Customise Your Sales Page

- Replace the sample text with your own business name and branding.
- Upload the supplied workbook mockup image to your WordPress Media Library and replace the existing image.
- Change the $7 price if you wish to charge a different amount.
- Connect the purchase button to your own checkout or payment system.
- Arrange automatic delivery of the workbook PDF after purchase.

- Check the page on desktop and mobile.

Step 5 – Publish Your Page

Once you've finished customising, click **Publish**.

Important: The purchase button is a placeholder. You must connect your own payment system and arrange delivery of the workbook before promoting your sales page.
